Senior Full Stack Developer - Full Time (Remote)

About the position

TaxCredible is seeking a creative and experienced full-stack developer to join our engineering team. Help drive forward movement as we build a brand new platform to change the landscape of business tax incentives!

Fully financed by its established parent company (Alpharesults), TaxCredible provides a unique opportunity to join a team at the very early stages that isn't subject to the pitfalls of other tech start-ups.

Who we want

We are looking for someone with general full-stack experience to help drive development of the core functionality of our new technology, providing a solid foundation on which we will build the rest of the platform.

As we expand our small and agile team, strong tangential tech skills are a must. Team roles will blend and flex as we find our stride.

Candidates should be able to discuss their role in prior projects, and provide further insight into how their contributions fit into a bigger picture.

Desired Attributes and Skills:
- Proven Senior-level development and team lead experience.
- Essential: Node (ExpressJS), VueJS, Web Components, MySQL, AWS, Linux admin, HTML, CSS.
- You will also use: Docker.
- Ability to produce and consume well documented REST APIs.
- A solid understanding of multi-node architecture is critical, including typical systems and their relationships. This also includes 3rd party vendor integrations.
- Productive when given broad requirements/constraints as well as working through narrowly-defined tasks.
- Can easily understand a high level description of a target architecture and flesh out the details from there.

- Does not blindly follow directions, but instead collaborates and contributes to the best way to design a system or implement a spec.
- Can provide oversight to other developers. Can review commits and provide feedback and training.
- Can document major subsystems so that other developers will understand how to use them.
- Experience implementing an advanced subsystem such as: a recommendation engine, platform integration layer, data synchronization mechanisms, etc.
- Experience building or leveraging tools to improve the development lifecycle (build tools, CI/CD, automation, etc.)

We highly value:
- Excellent communication skills.
- Passionate, detail-oriented individuals.
- A broad understanding of Software Engineering concepts (versus experience with the latest trends).
- Efficient, logical, legible and well-organized code and markup.
- An eagerness to learn and adapt.
- Experience working in a distributed team environment.

About TaxCredible

TaxCredible is a one-of-a-kind, connection SaaS platform for business tax incentives. As a growing network of providers, CPAs, clients, and economic developers, TaxCredible enables them to identify, provide, manage, obtain, and utilize state and federal business tax credits and incentives. TaxCredible enables clients to stop worrying about missing out on valuable incentives in a rapidly-changing economic and legislative environment – they have all the insights needed to keep ahead of the curve, and our team helps manage everything – all in one place.

What you can expect

- Expect to learn and grow with the company. We hope to foster a long term relationship.
- Participate in the development of legacy and leading-edge proprietary technologies and software including applications and reusable components.

- Contribute to regular testing via automated regression/unit tests and functional testing.
- Provide support to internal and external stakeholders.
- Work closely with a remote/distributed development team from wherever you are most comfortable and productive.
- Schedule is flexible, however regular work hours are expected to align with the normal work day in US-based timezones.
